RE: Ex Parte Communication, CC Docket No. 99-273

Dear Ms. Dortch:

The Federal Telecommunications Act of 1996 established a goal of promoting competition in all telecommunications markets, including the \$5-6 billion wireline directory assistance ("DA") market. In an attempt to address possible inequities in this market, the FCC opened CC Docket No. 99-273, however, little progress appears to have been made since.

In the interim, the KCC found sufficient competition exists in Kansas to allow price deregulation and customer specific pricing of DA services for Southwestern Bell in Docket No. 01-SWBT-932-MIS on June 12, 2001. However, this Commissioner believes the potential exists for greater competition in the DA market. We could support two possible approaches that are included among the significant filings to CC Docket No. 99-273. In priority order, those are:

Pre-subscription

a method for access to DA which would preserve the existing dialing pattern (or patterns), i.e. 411 (for local directory assistance) and NPA + 555-1212 (for toll or long distance directory assistance). Subscribers would designate their preferred providers of DA and this information would be maintained by the local service provider in such a manner that when the customer dials 411 and/or 555-1212, the DA call would be routed to the designated provider for that line number.

It seems plausible that only one DA code (411 or 555-1212) should be required for both local and toll directory assistance from the preferred DA provider. Given that scenario, the practical code recommended would be 411 for ease and simplicity.

No. of Copies rec'd  
1st ADOCE

OTC

list of copies rec'd  
list of copies rec'd

This method maintains the integrity of the existing, currently familiar dialing pattern(s) associated with directory assistance services at the same time it encourages increased competition between the DA providers.

#### Alternative Dialing Pattern

such as 555-XXXX, 411-XXXX, or 101XXXX codes would allow direct access to a preferred DA provider. Subscribers would simply dial the appropriate code and the call would be routed to the DA provider of their choice, in the same manner that toll providers may currently be designated using the respective company's 1010XXX code.

Again, it seems practical that only one code be used for both local and toll DA, (preferably 411-XXXX or 555-XXXX) so as not to add confusion or greater complexity to the dialing pattern. The practical code recommended would once again be 411 due to its simplicity and ease of transition.

This is not as simplistic as the pre-subscription method. However, it does provide a workable alternative that maintains the integrity of the existing, currently familiar dialing pattern(s) associated with DA services at the same time it encourages increased competition between the DA providers.

As a member of the Kansas Corporation Commission and to the extent that pre-subscription and/or an alternative DA dialing pattern could increase directory assistance services competition, including the anticipated benefits of lower prices and higher quality service, I encourage the FCC to move forward with CC Docket No. 99-273 as proposed above.

Respectfully submitted,

John Wine

RE: Ex Parte Communication, CC Docket No. 99-273

Dear Ms. Dortch:

The Federal Telecommunications Act of 1996 established a goal of promoting competition in all telecommunications markets, including the \$5-6 billion wireline directory assistance ("DA") market. In an attempt to address possible inequities in this market, the FCC opened CC Docket No. 99-273, however, little progress appears to have been made since.

In the interim, the KCC found sufficient competition exists in Kansas to allow price deregulation and customer specific pricing of DA services for Southwestern Bell in Docket No. 01-SWBT-932-MIS on June 12, 2001. However, this Commissioner believes the potential exists for greater competition in the DA market. We could support two possible approaches that are included among the significant filings to CC Docket No. 99-273. In priority order, those are:

#### Pre-subscription

a method for access to DA which would preserve the existing dialing pattern (or patterns), i.e. 411 (for local directory assistance) and NPA + 555-1212 (for toll or long distance directory assistance). Subscribers would designate their preferred providers of DA and this information would be maintained by the local service provider in such a manner that when the customer dials 411 and/or 555-1212, the DA call would be routed to the designated provider for that line number.

It seems plausible that only one DA code (411 or 555-1212) should be required for both local and toll directory assistance from the preferred DA provider. Given that scenario, the practical code recommended would be 411 for ease and simplicity.

This method maintains the integrity of the existing, currently familiar dialing pattern(s) associated with directory assistance services at the same time it encourages increased competition between the DA providers.

#### Alternative Dialing Pattern

such as 555-XXXX, 411-XXXX, or 101XXXX codes would allow direct access to a preferred DA provider. Subscribers would simply dial the appropriate code and the call would be routed to the DA provider of their choice, in the same manner that toll providers may currently be designated using the respective company's 1010XXX code.

Again, it seems practical that only one code be used for both local and toll DA, (preferably 411-XXXX or 555-XXXX) so as not to add confusion or greater complexity to the dialing pattern. The practical code recommended would once again be 411 due to its simplicity and ease of transition.

This is not as simplistic as the pre-subscription method. However, it does provide a workable alternative that maintains the integrity of the existing, currently familiar dialing pattern(s) associated with DA services at the same time it encourages increased competition between the DA providers.

As a member of the Kansas Corporation Commission and to the extent that pre-subscription and/or an alternative DA dialing pattern could increase directory assistance services competition, including the anticipated benefits of lower prices and higher quality service, I encourage the FCC to move forward with CC Docket No. 99-273 as proposed above.
